

THE STORY OF SHILOH

Shiloh was 18 months old when he was abandoned by his owner at a shelter. He was a strong dog physically but always sweet and eager to please but did not know how to do that. He suffered with entropion, an eye condition where the eyelashes grow into the eye.

This condition is horribly painful and left unattended, will cause total blindness. Without help from a rescue group, Shiloh had no chance to be adopted from the shelter. Shiloh's guardian angel came in the form of a rescue person taking the time to issue a plea for him. He was pulled from the shelter to receive eye surgery to correct his painful eye problem. A special family stepped up to foster Shiloh through the surgery and healing process. He received some basic training to learn to walk on leash without pulling. He learned house manners and how to play with other dogs. Shiloh learned what it means to be part of a family.

UPDATE: Shiloh found his perfect family at an adoption fair. The family includes another dog and they have become fast friends. Shiloh is HOME!

The purchase of this card will help to fund the care of animals like Shiloh.
